DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 27, 38, 43 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claim 27 and 38 recite the limitation "the second output voltage amplitude".

There is insufficient antecedent basis for this limitation in the claim.

4. Claim 43 recites the limitation "second efficiency maximum". There is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

5. Claim 24-26, 28-37, 39-42, 44-46 allowed.

6. Claim 27, 38, 43 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

7. The following is a statement of reasons for the indication of allowable subject matter: Cited references do not disclose at least controlling the second and third power amplifier entities at output voltage amplitudes below a first output voltage amplitude to deliver less current than a linearly increasing current function defined by zero current at zero output voltage amplitude and a minimum required current at an output voltage equal to a maximum linear output voltage that can be achieved with the first, second,

and third amplifier entities when the second and third amplifier entities deliver current with substantially 180 degrees phase difference in addition to other limitation.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Meinzer (US 5,017,888), Gailus et al. (US 5,071,775), Shiikuma (US 7,262,656), and related patents of the inventors of this application (US 7,279,971, US 7,221,219) disclose similar amplifier systems.
